### A love hate relationship

**Roen427** Canada September 2, 2015

**Industry:** Transportation

I bought these as my summer boots. They were small an hurt the top of my foot. But after I broke them in omg I feel in love with them. Lite weight an I'm a trucker they do get caught in the peddles awesome on wet muddy decks. I do every thing from drive,run loader,work in the shop,an field work an crude oil don't wreck them.

**Work Environment:** Hot, Wet, Dry, Cement Surface, Dirt, General Outdoor, Steel, Uneven Terrain, Smooth Surfaces, Jagged Environment, Sparks/Slag (Welding), General Indoor

### I'll never wear another boot again

**Kelly** Calgary July 18, 2015

**Industry:** Oil/Gas

Absolutely hated these boots until I broke them in after a week or two. After that they're my favourite boot. Working on a drilling rig these are my favourite summer work boots, not heavy or bulky, feet never get wet, stands up very well to invert, also have never slipped while wearing them. I even find myself wearing them at home almost every day. I just wish they made an insulated set of these!

**Work Environment:** Hot, Cold, Wet, Dry, Dirt, General Outdoor, Steel, Uneven Terrain, Corrosive Chemicals, Smooth Surfaces, Jagged Environment, General Indoor

### Great product

**NickyB69** Abingdon, MD 21009, USA January 19, 2015

**Industry:** Utilities

These boots are awesome, long lasting, hard working. Only thing I wish they had incorporated is a Gore-Tex lining, but even without it they the leather is water resistant, my feet never get wet

**Work Environment:** Uneven Terrain, General Outdoor, Dirt

### Great against thorns

**Oldshoe** Sedalia, MO 65301, USA October 1, 2014

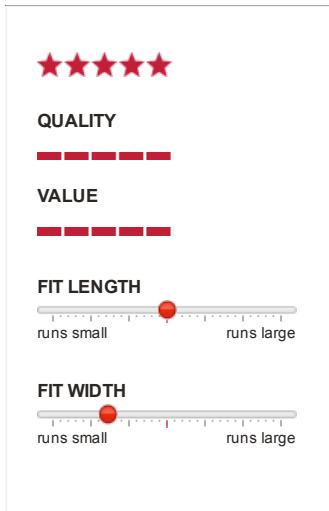

**Industry:** Manufacturing

I bought these to use while clearing Honey Locust and Osage Orange trees. I have worked around these nasty trees for approximately 100 plus hours and have not had one get through yet. I have pulled literally hundreds of broken thorns from the soles, but none have made it through. I wore these boots daily for two years before the soles started splitting from age and abuse. I have bought my second pair now and will continue to walk among the thorns with confidence.

**Work Environment:** Sparks/Slag (Welding), Cement Surface, Wet, Uneven Terrain, General Outdoor, Dry, Hot, Jagged Environment, Dirt, Smooth Surfaces, Cold, General Indoor, Steel, thorns

### Great Work Boots

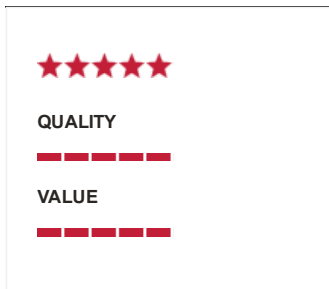

**M9130** NC June 15, 2014

I've had 2 pairs of these boots and they have long outlasted other brands of boots. They are rugged and tough, built to last in a hard working environment. Very comfortable on concrete and hard surfaces. Great traction on soft, slippery, wet ground

**Work Environment:** Cement Surface, Wet, Uneven Terrain, General Outdoor, Dry, Hot, Dirt, Cold

The first pair of work boots I've ever had for more than a year. These boots have stood the test of time and abuse, going on four years that's right 4. I've put new soles on once and think I may have to buy a new pair as these ones have worn a one inch hole in the front where they flex, plus the stress points on the foot portion are wearing thru. I wear these boots 365 days of the year and find them very comfortable. They have seen sun, rain ,snow, diesel fuel, oil grease and anything else that I've been in. In my opinion Red Wing makes a quality boot.
